Rocky Flats Stewardship Council Meeting
Public Comment Period
(Ted Ziegler), Former Employee @ the Rocky Flats Plant Site (RFPS)

Subject: (RFPS), (Soil) Contamination and Exposures:

Contamination and Exposure issues at the Rocky Flats Plant Site **(RFPS)** of record, have been repeatedly addressed in the past by myself, as a former Union Safety Representative also by many other individuals,

(Please Note), Since 1951 and through the closure of the **(RFPS)** 2005, all of the **(RFPS)** (Contractors), Knowingly were allowed to conduct business resulting in many Violations and Inconsistent Standards of Conduct of business that were not in the best interest of the Health and Safety of the **(RFPS)** Employees, or our Citizens as well as the environment in the State of Colorado.

To date, unacceptable Resolutions and enforcement of these inexcusable **(Violations)** at the **(RFPS)**, have repeatedly and continue to be brushed aside with our regulatory representatives.

Historically in the past these issues have been Addressed Repeatedly, and provided to the Department of Energy (DOE) , (Environmental Protection Agency (EPA), Colorado Department of Health & Environment, (CDPHE), (RFPS) Contract Managers, (RFPS) Legacy Management, Industrial Hygiene (IH), Etc, resulting in nothing less than a Game of chess and deliberate attempt of Deception.

Since 2005, and the closure of the (RFPS), Sub Contractor Employees and other workers involved in (Soil) activities on the (RFPS), have been exposed to potential Toxic and Hazardous Materials , that currently exist in and on the (Soil) at the (RFPS).

Concerns:

- a : Soil sampling in the past not been required, for all Toxic and Hazardous material used at the (RFPS).**
- b : (Deception), (CDPHE), Comparing (Plutonium) to be no more hazardous than off site materials, Dry Cleaning Fluid, Cigarette Smoking, Asphalt Paving Etc,**
- c : (CDPHE) Carl Spring, be required to provide sufficient Scientific evidence, (concern) b:**
- d : (RFPS) Was not intended to be designated as a (Colorado Burial Waste Site) for Toxic & Hazardous Materials that currently remain in the (Soil), below and on the surface at the **(RFPS)**.**
- e : Continued Intentional, Misleading Deception's Continue to exist concerning the Environmental Safety at the (RFPS), (please note), The (RFPS) will never be completely Safe for human access.**
